

Full Stack Developer

Job Brief

Do you use existing technologies and think of how you can make them better?
Do you build your own code on your free time and want to tell others about it?
Do you know how to build 'simple first' and iterate to a full-perfect solution?
A new ad-tech startup is building its tech team in Yad-Hana, Emek-Hefer and you just might be the one we're looking for.

What you need to join the team:

- Intellectual curiosity
- Great attitude, team player and energy amplifier
- Excellent communication and analytical skills
- Flexible and adaptable to changing priorities and technologies
- Innovative thinking with a passion for problem-solving
- Ability to provide a logical framework to support conclusions and ideas
- Knowledge of Front End web development for Web and Mobile apps
- Adherence to work off-hours on-demand

Responsibilities:

- Work as part of a dynamic team throughout the front-end development life cycle (websites, backend admin, web-applications, client-side)
- Collaborate with analysts to implement enhancements or new applications
- Strong analytical and problem-solving skills
- Conduct design and code review to ensure compliance with standards
- Estimate level of effort to develop code to meet acceptance criteria
- Ability to work independently in a fast paced, unstructured environment
- Ensure adherence to continuous improvement practices as required to meet quality / time to market imperatives

Qualifications:

- At least 3 years of Java development experience
- At least 3 years of Web development experience
- General knowledge of both front-end and back end web development
- Some experience with PostgreSQL, Mongo or MySQL.\
- Technologies: #java, #javascript, #PHP, #HTML5, #CSS3, #jQuery, #GoogleTagManager, Google-Analytics API, REST & SOAP API, Cloud-hosting, Open-source technologies

Think you are the right person?
